# Starlite

Transvideo's *Starlite* family of 5" HD OLED touchscreen monitors are designed to be intuitive to the professionals. The *Starlite* hosts a high-resolution display with built-in tools such as waveform monitor, vectorscope, histogram or again a virtual horizon based on an internal gyroscope.

The menu is customizable with "Smart Corner" shortcuts. The *Starlite* has low power consumption whilst an embedded recorder delivers dailies in .h264 directly onto SD cards up to 128GB.

Despite of its light weight the *Starlite* is built to last with a rugged machined aviation-grade aluminium body.

Several accessories, including a sun hood or a protective cover, fit magnetically on the front of the monitor.

## Starlite HDs

The **Starlite HDs** inspired the entire range.

With intuitive customizable touchscreen, the user is finally free of endless menus.

Versatile, it is a toolbox finding its place on the most exigent sets. Despite its light weight and small size, the **Starlite HDs** is built to last with an aluminium machined body.

## Starlite HD-e

**Starlite HD-evolution** adds the facility to record lenses metadata on a SD-card when connected to an intelligent lens as **ARRI**® LDS, Cooke®/i or **ZEISS**® eXtended.

Captured directly from the lens with the camera timecode, the metadata save both time and money in post-production by offering technical information to the VFX department.

## Starlite *HDs* ARRI®

Only available through **ARRI®**'s sales channels, the **Starlite *HDs*-ARRI®** remotes the ALEXA Mini and the AMIRA through a specific menu activated when the monitor is connected to the EXT connector of the camera. **Starlite *HDs*-ARRI®** is compatible with any other cameras with standard functionalities.

## Starlite *RF-a*

The **Starlite *RF-a*** develops 200m/600ft of wireless transmission and includes user controls of **ARRI®**'s ALEXA Mini and AMIRA as standard whilst usable also on any other camera (without the controlling mode). The **Starlite *RF-a*** is part of the **Titan *HD2*** system that includes transmitter and standalone receivers. This package creates a reliable connection in just a few seconds.

# Starlite WVS

Only available through **ARRI®**'s sales channels, **Starlite HDs-WVS** is part of the **ARRI®** Wireless Video System; it is the perfect companion of the Alexa SXT-W.

The **Starlite HDs-WVS** shares the same ease of use and reliability of the **ARRI® WVS** system.
